CONSUMABLES / FILTERS

FIBERGLASS & FIBERGLASS POLYESTER

- Trap over 99% of airborne paint particles without restricting airflow.
- Minimize booth shutdown and reduce exhaust system maintenance.
- Progressively dense, spun-woven design is engineered to ensure maximum depth loading capacity.
- Unique paint arrestors promote uninterrupted airflow through the paint booth and an exceptionally long service life.

PAPER & PAPER-POLY PAINT FILTERS

- Six-layer paper media consists of multi-layered slits of expanded Kraft.
- The structure is ideal for capturing air dry enamels, primers and stains.
- Helps prevent semi-dry airborne particles from settling on already finished parts.
- Five-layer paper with poly backing is highly effective in capturing high solids, bake enamels, waterborne or tacky coatings.

PAINT POCKETS

- Paint Pockets® Green unique design holds upwards of five times more paint or powder than other leading filters.
- The remarkable longevity of the collector helps cut down on maintenance time by up to
- It also has a superior wet tensile strength and won't sag or tear when loaded with paint.
- Applicable in automotive, industrial and aerospace plant operations.

INTAKE FILTERS

- Broad range of filters in a variety of sizes for commercial and industrial applications.
- Highly efficient, extended-surface, pleated panel filters are specifically engineered to provide higher initial efficiencies.
- Completely disposable and interchangeable with other panel filters without modification to existing equipment.

PEELABLE BOOTH COATING

- · Protects walls, windows and light fixtures.
- Spray or roll it on using conventional equipment.
- Eliminates harmful paint residue build-up in minutes.
- Bright, light-reflective surface significantly improves visibility within booth.
- Quick drying and durable coating strips off evenly, without leaving residue.

FLAME RETARDANT FLOOR COVERING

- Paper-based materials provides economical compliance with OSHA standards.
- Absorbs paint residue and cleans up instantly.
- Available in rolls ranging from 36" to 84" wide and up to 500' in length.
- Well-suited for shielding walls and floors of a booth, the protective cover accommodates individual maintenance needs and budgets.
- Reduces the hazard of paint booth fires.

BOOTH LIGHT PROTECTIVE FILM

- Fast protection of fixtures, lights and windows.
- Available in 12" and 18" widths, up to 100' in length.
- Protective clear light plastic film.
- Excellent adhesion characteristics allows for use on a wide range of applications.
